PROFESSIONAL SUMMARY

Second-year Interactive Technology student with experience in C#, C++, and software development across multiple environments. Strong background in problem-solving, debugging, and collaborative project work. Proven communication skills from customer-facing roles. Adaptable, detail-oriented, and eager to apply technical abilities to real-world software development challenges.

EDUCATION

Full Sail University — B.S. Interactive Technology, Game Design Concentration (2024–2026)
GPA: 3.75 / 4.0

Relevant Coursework: Algebra & Coordinate Geometry, Discrete Mathematics, Programming for Interactive Tech, Probability, Analytics & Decision-Making, Scripting for Designers

West Orange High School — High School Diploma (2024)

WORK EXPERIENCE

Front of House Team Member — Chick-fil-A (Oct 2023 – May 2024)

- Processed payments while ensuring accurate cash handling and resolving order discrepancies.
- Delivered friendly customer service in a high-volume environment.
- Managed multiple customer orders during peak hours.
- Coordinated with kitchen and drive-thru teams to streamline order flow.

Produce Clerk — Publix (Aug 2023 – Oct 2023)

- Managed inventory through stock rotation, date checks, and accuracy control.
- Responded quickly to shifting priorities during rushes and deliveries.
- Communicated with team members to coordinate workflow and restocking.

SKILLS

- C#
- C++ (developing proficiency)
- Object-Oriented Programming (OOP)
- Debugging & Problem-Solving

- Version Control (Git, GitHub, Diversion)
- Team Collaboration
- Strong Communication
- Leadership & Task Management
- Adaptability in Fast-Paced Environments
- Attention to Detail

PROJECTS

Jester Dice — Programmer | GDScript, Godot | Team of 2

- Developed core systems using object-oriented programming and debugging tools.
- Collaborated using Diversion Version Control.
- Built and iterated full project under a 2-week deadline.

Knight at the Library — Programmer | Blueprints & Unreal Engine | Team of 7

- Collaborated with multi-disciplinary teammates using version control.
- Built and refined features under a strict 68-hour deadline.
- Implemented systems using C++ and event-driven logic.
- Solved performance and runtime issues through debugging and optimization.
